Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 June 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no disclosure in the Specification as to how each winding ratio is determined such that, with each change, the post-decimal point part of the winding ratio will change by 0.1 at most. The graph of Figure 2 and Table 1 on pages 6-7, disclose winding ratio values and show the post decimal difference is 0.1 at most, but the Specification does not describe what is used to determine the values in the graph and table. Further, the Specification states that the winding ratio can be determined by the equation on page 9 and in Claim 12, but it is not clear how the equation ensures the post-decimal point difference is 0.1 at most with each change in winding ratio. Without any calculation examples and/or typical values for the variables involved in the equation, one of ordinary skill in the art cannot decipher how the equation would ensure the claimed post-decimal difference. Therefore, the Specification does not enable one of ordinary skill in the art at the time of the invention to use the process of the claimed

invention, as it is not clear how the winding ratios are determined to ensure the post-decimal difference, at each winding ratio change, is 0.1 at most without undue experimentation.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM E. DONDERO whose telephone number is (571)272-5590. The examiner can normally be reached on Monday through Friday 7:00 am to 4:30 pm.
